JORDI BACARDIT ALAVEDRA

GAME PRODUCTION & DESIGN

Barcelona, Spain • Open to relocation • jordibacardit12@gmail.com
Portfolio: jordibacardit.com • LinkedIn: linkedin.com/in/jordi-bacardit/

PROFILE

Game production and design. I plan and design small games end to end, from the first idea to playtesting and release: scope and task planning in Trello, version control on GitHub, regular team check-ins and playtests. Hands-on development in Unity and Unreal Engine.

SELECTED PROJECTS

Lost On The Gates • Game Designer & Producer • Unity / C#
WW2 tank survival game made in Unity by a team of two (3 months, part-time). Came up with the concept, designed the game and managed the project: Trello tasks, GitHub version control, regular check-ins, playtests with friends, and the itch.io release with a trailer. Built health and ammunition, kill tracking, HUD and scene flow; handled sound, lighting and atmosphere; helped build the tank and the enemies.

Finn Adventure • Solo developer • Unity / C#
A 2D pixel platformer with three levels and a final boss, made solo in 1.5 months and released on itch.io. Designed levels where difficulty grows through layout (harder jumps, timing, more enemies); programmed the game.

Reservio • Laravel / PHP / MySQL
Full-stack property booking platform. Built user authentication, CRUD operations, relational database design, reservations, reviews and photo management.

ArtScan • Android / Kotlin
Android app for managing artworks through QR scanning, with structured artwork data, RecyclerView-based interfaces and app data management.

SKILLS

Production & Design: scope and task planning, playtesting, game and level design; Trello, Google Sheets, Figma
Game Development: Unity, Unreal Engine, gameplay programming, prototyping
Programming: C#, C++, C, Python, PHP, Kotlin, Swift, JavaScript
Web & Data: Laravel, Blade, Astro, Tailwind CSS, MySQL, MongoDB
Mobile / Creative Coding: Android Studio, iOS apps (Swift), QR/Barcode scanning, Processing, p5.js
Tools: Git, GitHub, Visual Studio Code

WORK EXPERIENCE

Access Controller | L'Agrícola Regional, S.A. — Montserrat, Spain | May 2024 – Present
- Manage visitor access and flow at the Basilica of Montserrat, one of Catalonia's most visited sites.
- Resolve incidents and coordinate with colleagues in real time in a high-traffic, public-facing environment.

Maintenance Technician | Rubio Julve S.L. — Sant Sadurní d'Anoia, Spain | Summer 2026
- Supported industrial maintenance and mechanical tasks, following technical instructions and safety procedures.
- Adapted quickly to new tasks in a time-sensitive, hands-on team environment.

Cashier / Stock Clerk | Roges Supermercats S.L. — Pont de Vilomara, Spain | Dec 2022 – Aug 2023
- Handled payments, customer service and stock replenishment in a fast-paced retail environment.

EDUCATION

Bachelor's Degree in Multimedia, Applications and Video Games Engineering | 2027
Universitat de Vic (UVic) — Vic, Spain
